5 META: Title
6 =====
7
8 - TITLE: Sample
9 - SUBTITLE: Sample Specification
10
11 SPEC: Data Model (DM)
12 =====
13
14 ENTITY: Unit
15 -----
16
17 An organizational unit of the enterprise, BECAUSE the organization is
18 structured into nested units which group the people working in them.
19
20 - ATTRIBUTE: id; TYPE: 'unique uuid'; DEFAULT: 'uuid()';
21   Unique identifier of the unit, BECAUSE every unit needs a stable
22   handle independent of its name.
23
24 - ATTRIBUTE: name; TYPE: 'string';
25   Full name of the unit, BECAUSE the unit is addressed by a
26   human-readable label.
27
28 - ATTRIBUTE: abbreviation; TYPE: 'string';
29   Short form of the unit name, BECAUSE compact renderings like org
30   charts have no room for the full name.
31
32 - RELATION: parentUnit; TYPE: [[ENTITY:Unit]]; ARITY: '0..1';
33   The unit this unit is nested in, BECAUSE the units form a hierarchy
34   whose top-most unit has no parent.
35
36 - RELATION: members; TYPE: [[ENTITY:Person]]; ARITY: '0..n';
37   The people assigned to this unit, BECAUSE a unit is staffed by an
38   arbitrary number of people.
39
40 - RELATION: director; TYPE: [[ENTITY:Person]]; ARITY: '0..1';
41   The person heading this unit, BECAUSE a unit has at most one
42   accountable lead.
43
44 ENTITY: Person
45 -----
46
47 An individual person working in the organization, BECAUSE the
48 organization is staffed by people who are assigned to its units.
49
50 - ATTRIBUTE: id; TYPE: 'unique uuid'; DEFAULT: 'uuid()';
51   Unique identifier of the person, BECAUSE names are neither stable
52   nor unique across the organization.
53
54 - ATTRIBUTE: name; TYPE: 'string';
55   Full name of the person, BECAUSE people are addressed by their
56   human-readable name.
57
58 - ATTRIBUTE: initials; TYPE: 'string';
59   Short form of the person name, BECAUSE compact renderings like org
60   charts have no room for the full name.
61
62 - ATTRIBUTE: role; TYPE: 'string';
63   Job role of the person, BECAUSE the responsibility of a person has
64   to be visible beside their unit assignment.
65
66 - RELATION: belongsTo; TYPE: [[ENTITY:Unit]]; ARITY: '0..1';
67   The unit this person is assigned to, BECAUSE a person works in at
68   most one unit at a time.
69
70 - RELATION: supervisor; TYPE: [[ENTITY:Person]]; ARITY: '0..1';
71   The person this person reports to - BECAUSE the reporting lines form
72   a hierarchy whose top-most person has no supervisor.
73
```

01 ● SPEC: Data Model (DM) ↴

01.01 ● ENTITY: Unit ↴

An organizational unit of the enterprise — BECAUSE the organization is structured into nested units which group the people working in them.

ATTRIBUTE	TYPE	DEFAULT	Description
id	unique uuid	uuid()	Unique identifier of the unit — BECAUSE every unit needs a stable handle independent of its name
name	string		Full name of the unit — BECAUSE the unit is addressed by a human-readable label
abbreviation	string		Short form of the unit name — BECAUSE compact renderings like org charts have no room for the full name
RELATION			
parentUnit	ENTITY: Unit	0..1	The unit this unit is nested in — BECAUSE the units form a hierarchy whose top-most unit has no parent
members	ENTITY: Person	0..n	The people assigned to this unit — BECAUSE a unit is staffed by an arbitrary number of people
director	ENTITY: Person	0..1	The person heading this unit — BECAUSE a unit has at most one accountable lead

01.02 ● ENTITY: Person ↴

An individual person working in the organization — BECAUSE the organization is staffed by people who are assigned to its units.

ATTRIBUTE	TYPE	DEFAULT	Description
id	unique uuid	uuid()	Unique identifier of the person — BECAUSE names are neither stable nor unique across the organization
name	string		Full name of the person — BECAUSE people are addressed by their human-readable name
initials	string		Short form of the person name — BECAUSE compact renderings like org charts have no room for the full name
role	string		Job role of the person — BECAUSE the responsibility of a person has to be visible beside their unit assignment
RELATION			
belongsTo	ENTITY: Unit	0..1	The unit this person is assigned to — BECAUSE a person works in at most one unit at a time
supervisor	ENTITY: Person	0..1	The person this person reports to — BECAUSE the reporting lines form a hierarchy whose top-most person has no supervisor
